

UNIVERSITY OF  
LIVERPOOL

MSc

# Data Science and Artificial Intelligence with a Year in Industry

**Study mode**

Full-time

**Duration**

24 months

Apply by: **29 August 2025**

Starts on: **22 September 2025**

## About this course

This conversion MSc introduces those without a computer science related degree to Data Science and AI principles, with a thorough grounding in mathematics and statistics, data mining, artificial intelligence and the fundamentals of programming, to enable you to develop a toolkit of skills in data science and emerging technologies.

---

## Introduction

With organisations increasingly reliant on data science and artificial intelligence (AI), understanding how to analyse, validate and interpret data can significantly enhance your employability.

If you're a graduate in a subject that's not related to computer science, this conversion MSc will complement your first degree and prepare you to meet the high demand for professionals in data science and AI technologies.

With the roots of data science embedded in mathematics, we'll start year one by introducing you to linear algebra, differential calculus, probability theory and statistics. This will prepare you for working with data mining algorithms and experimenting using real-world data.

You'll receive an overview of how to design and create software, including an intensive introduction to programming, and explore key topics in AI. We'll also provide a thorough grounding in how to plan and conduct research.

Further opportunities to specialise and enhance your knowledge of big data, web programming, bio-inspired algorithms and modern information systems are available through a range of optional modules.

In year two, you'll undertake an industrial project in a real-world environment as part of an extended placement opportunity.

---

## Who is this course for?

This is a conversion MSc, designed for those without a computer science related degree, who are seeking to develop their maths skills and their knowledge and technical expertise in the areas of Data Science and AI. If you do have a Computer Science related degree, you may want to consider applying for the [Advanced Data Science and Artificial Intelligence with a Year in Industry MSc](#).

## Which postgraduate degree is right for you?

The Department of Computer Science offers master's programmes for students with undergraduate degrees in Computer Science and other disciplines.

If you have a Computer Science related degree, you could be eligible for the following master's courses:

- [Advanced Computer Science MSc](#)
- [Advanced Computer Science with a Year in Industry MSc](#)
- [Advanced Data Science and Artificial Intelligence MSc](#)
- [Advanced Data Science and Artificial Intelligence with a Year in Industry MSc](#)
- [Theoretical Computer Science MSc](#)
- [Theoretical Computer Science with a Year in Industry MSc](#)
- [Cyber Security MSc](#).

Computer Science related degrees may include degree titles such as: Computer Applications, Computer Science, Computer Engineering, Computer Applications and Engineering, and Software Engineering. Please note that this list is not exhaustive. Any Computer Science related degree should contain a significant amount of computer science related modules to be relevant (as assessed by the Department of Computer Science).

If you don't have a Computer Science related degree and you are interested in learning more about the field, you may be eligible to study:

- [Data Science and Artificial Intelligence MSc](#)

- [Data Science and Artificial Intelligence with a Year in Industry MSc](#)
- [Computer Science MSc](#)
- [Computer Science with a Year in Industry MSc](#)
- [Cyber Security MSc.](#)

Please check individual course pages for detailed entry requirements.

---

## What you'll learn

- How to design and create software using a modern programming language
- Essential mathematical concepts and techniques in linear algebra, differential calculus, probability theory and statistics
- Key topics in artificial intelligence, including machine learning, deep learning, natural language processing (NLP) and computer vision
- How to develop web applications
- The role of artificial intelligence in communication
- Data mining techniques and challenges using real-world datasets
- Application of visualisation methods to data mining
- Research skills in computer science
- Bio-inspired algorithms for optimisation and machine learning
- How big data is collected and used in modern society
- The role of structured query language, SQL, in information systems.

---

## Accreditation

This course is pending accreditation by BCS, The Chartered Institute for IT.

# Course content

Discover what you'll learn, what you'll study, and how you'll be taught and assessed.

## Year one

You'll study five compulsory modules and three optional modules in year one.

## Modules

Compulsory modules	Credits
<a href="#"><u>RESEARCH METHODS IN COMPUTER SCIENCE (COMP516)</u></a>	15
<a href="#"><u>PROGRAMMING FUNDAMENTALS (COMP517)</u></a>	15
<a href="#"><u>MATHS AND STATISTICS FOR AI AND DATA SCIENCE (COMP533)</u></a>	15
<a href="#"><u>APPLIED ARTIFICIAL INTELLIGENCE (COMP534)</u></a>	15
Optional modules	Credits
<a href="#"><u>DATABASE AND INFORMATION SYSTEMS (COMP518)</u></a>	15
<a href="#"><u>BIG DATA AND SOCIETY: FOUNDATIONS, POLITICS, AND POLICY B (COMM752)</u></a>	15
<a href="#"><u>WEB PROGRAMMING (COMP519)</u></a>	15
<a href="#"><u>ARTIFICIAL INTELLIGENCE AND COMMUNICATION B (COMM718)</u></a>	15
<a href="#"><u>MACHINE LEARNING AND BIOINSPIRED OPTIMISATION (COMP532)</u></a>	15

Optional modules	Credits
<a href="#"><u>COMPUTATIONAL INTELLIGENCE (COMP575)</u></a>	15
<a href="#"><u>DATA MINING AND VISUALISATION (COMP527)</u></a>	15

Programme details and modules listed are illustrative only and subject to change.

## Year two

COMP599 MSc Industrial Project and COMP598 MSc Placement Experience are completed across the duration of year two.

## Modules

Compulsory modules	Credits
<a href="#"><u>MSC PLACEMENT EXPERIENCE (COMP598)</u></a>	60
<a href="#"><u>MSC INDUSTRIAL PROJECT (COMP599)</u></a>	60

Programme details and modules listed are illustrative only and subject to change.

## Teaching and assessment

### How you'll learn

Teaching on the first year of this programme comprises formal lectures, small group tutorials and practical sessions in computer laboratories. You will also take part in one or more group projects. In your second year, you'll undertake an industrial project in a real-world environment.

### How you're assessed

Modules in the first year of the course are assessed through a combination of examinations and coursework. The examinations take place at the end of each

semester and typically take the form of an in-person written assignment, usually to be completed in a couple of hours. You'll be assigned coursework across the length of each semester. This typically takes the form of class tests, programming assignments or small projects.

The second year of the course is assessed through a portfolio of evidence from your industrial placement and a major project undertaken in your placement setting.

## Liverpool Hallmarks

We have a distinctive approach to education, the Liverpool Curriculum Framework, which focuses on research-connected teaching, active learning, and authentic assessment to ensure our students graduate as digitally fluent and confident global citizens.

The Liverpool Curriculum framework sets out our distinctive approach to education. Our teaching staff support our students to develop academic knowledge, skills, and understanding alongside our **graduate attributes**:

- Digital fluency
- Confidence
- Global citizenship

Our curriculum is characterised by the three **Liverpool Hallmarks**:

- Research-connected teaching
- Active learning
- Authentic assessment

All this is underpinned by our core value of **inclusivity** and commitment to providing a curriculum that is accessible to all students.

# Careers and employability

Data science and artificial intelligence driven technologies are becoming integral parts of our lives and changing the ways people do business.

Nearly every organisation uses data science and artificial intelligence to refine and streamline their business practices. The significant opportunities afforded by the application of data science and artificial intelligence across so many different sectors, from IT and healthcare to government agencies, mean that professionals in this area are in high demand, with job opportunities far outstripping supply.

This MSc addresses this skills gap by preparing you for an exciting career in data science and artificial intelligence. This includes interdisciplinary opportunities tailored to your individual expertise, achieved by coupling knowledge of data science and artificial intelligence with the knowledge that you acquired from your first degree.

You'll be well placed on graduation to secure a variety of roles, including:

- Data analyst
- Data scientist
- Data engineer
- Database manager or administrator
- Machine learning practitioner
- Data architect
- Statistician
- Business analyst
- IT consultant.

Your expertise working with data will also provide ideal preparation for potential PhD study.

In the UK, graduate schemes in data analysis and business intelligence at larger companies tend to offer a starting salary of around £30,000.

Salaries for data analysts are typically between £30,000 and £40,000.

Experienced, high-level and consulting jobs can attract salaries of £60,000 or more.

# Fees and funding

Your tuition fees, funding your studies, and other costs to consider.

## Tuition fees

### UK fees (applies to Channel Islands, Isle of Man and Republic of Ireland)

Full-time place, per year – £13,300

Year in industry fee – £2,700

### International fees

Full-time place, per year – £30,800

Year in industry fee – £6,200

Fees stated are for the 2025–26 academic year.

Tuition fees cover the cost of your teaching and assessment, operating facilities such as libraries, IT equipment, and access to academic and personal support.

- You can [pay your tuition fees in instalments](#).
- All or part of your tuition fees can be [funded by external sponsorship](#).
- International applicants who accept an offer of a place will need to [pay a tuition fee deposit](#).

If you're a UK national, or have settled status in the UK, you may be eligible to apply for a Postgraduate Loan worth up to £12,167 to help with course fees and living costs. [Learn more about paying for your studies..](#)

## Additional costs

We understand that budgeting for your time at university is important, and we want to make sure you understand any course-related costs that are not covered by your tuition fee. This could include buying a laptop, books, or stationery.

Find out more about the [additional study costs](#) that may apply to this course.

---

# Entry requirements

The qualifications and exam results you'll need to apply for this course.

---

## Postgraduate entry requirements

We accept a 2:2 honours degree from a UK university, or an equivalent academic qualification from a similar non-UK institution. This degree should be in a subject that's not related to computer science.

Students on this conversion programme come from various academic backgrounds, therefore we strongly recommend that you [review the pre-reading](#) for the topics being introduced, to help prepare for studying this MSc.

---

## International qualifications

[Select your country or region to view specific entry requirements.](#)

Many countries have a different education system to that of the UK, meaning your qualifications may not meet our entry requirements. Completing your Foundation Certificate, such as that offered by the [University of Liverpool International College](#), means you're guaranteed a place on your chosen course.

---

# English language requirements

You'll need to demonstrate competence in the use of English language, unless you're from a [majority English speaking country](#).

We accept a variety of [international language tests](#) and [country-specific qualifications](#).

International applicants who do not meet the minimum required standard of English language can complete one of our [Pre-Sessional English courses](#) to achieve the required level.

---

## **IELTS**

6.5 overall, with no component below 5.5

---

## **TOEFL iBT**

88 overall, with minimum scores of listening 17, writing 17, reading 17 and speaking 19. TOEFL Home Edition not accepted.

---

## **Duolingo English Test**

120 overall, with no component below 95

---

## **Pearson PTE Academic**

61 overall, with no component below 59

---

## **LanguageCert Academic**

70 overall, with no skill below 60

---

## **PSI Skills for English**

B2 Pass with Merit overall and no band below B2 Pass

---

## **INDIA Standard XII**

National Curriculum (CBSE/ISC) – 75% and above in English. Accepted State Boards – 80% and above in English.

---

## **WAEC**

C6 or above

---

## **Pre-sessional English**

Do you need to complete a Pre-sessional English course to meet the English language requirements for this course?

The length of Pre-sessional English course you'll need to take depends on your current level of English language ability.

## Pre-sessional English in detail

If you don't meet our English language requirements, we can use your most recent IELTS score, or [the equivalent score in selected other English language tests](#), to determine the length of Pre-sessional English course you require.

Use the table below to check the course length you're likely to require for your current English language ability and see whether the course is available on campus or online.

Your most recent IELTS score	Pre-sessional English course length	On campus or online
6.0 overall, with no component below 5.5	6 weeks	On campus
5.5 overall, with no component below 5.5	10 weeks	On campus and online options available
5.5 overall, with no more than one component below 5.5, and no component below 5.0	12 weeks	On campus and online options available
5.5 overall, with no component below 4.5	20 weeks	On campus
5.0 overall, with no component below 4.5	30 weeks	On campus
4.5 overall, with no more than one component below 4.5, and no component below 4.0	40 weeks	On campus

If you've completed an alternative English language test to IELTS, we may be able to use this to assess your English language ability and determine the Pre-sessional English course length you require.

Please see our guide to [Pre-sessional English entry requirements](#) for IELTS 6.5 overall, with no component below 5.5, for further details.
